AQUA - RELEASE

Water based concrete release agent

Aqua Release is a high quality fast drying water based concrete release agent. Due to its chemical reaction and low surface tension it produces smooth and void free surface to concrete. Aqua Release is non-staining and contains rust inhibitors to protect metal forms against rusting.

ADVANTAGES:

- Non-staining
- Provides maximum coverage
- Stable in hot or cold weather
- Contains no wax
- Sprayable

INSTRUCTIONS:

Aqua Release is a highly effective release agent and may be used on all types of forms including foam liners. Protect treated surface from all traffic until concrete is poured.

Application:

1. Apply the release agent by low-pressure spray, roller, mop or fogger to the form at the rate of 1000 to 2000 sq. ft. per gallon.
2. Wipe off excess material.
3. Allow for drying.
4. Place concrete.
