RUST REMOVER 210

Rust Remover 210 is a blend of super powered concentrate of acids, wetting agents, and penetrants which effectively dissolves away rust, scales, calcite and other surface contamination from masonry, concrete and ferrous metals.

Properties:

- | | |
|-------------------------|---|
| 1. Appearance and odor: | Clear amber colored solution with acid odor |
| 2. pH of 1% solution | 1-2 |
| 3. Solubility in water | Soluble |

Application Instructions:

1. For best result use Rust Remover 210 as is or dilute 1 part Rust Remover 210 with up to 5 parts of water depending on rust and calcite build-up.
2. Apply the prepared solution onto the surface to be cleaned. Some agitation will enhance the cleaning process.
3. Flush with plenty of water and repeat the application if required.

Safety:

This product contains mineral acid. Avoid contact with skin and eyes; wear rubber gloves, goggles.
