## ***Brightener 123*** for **Stainless Steel**

**Britener 123** is a concentrated chemical solution that removes oxide, contaminants and brightens all series stainless steel. **Britener 123** special formula effectively removes the brown rust spots, heat discoloration, grease and oil and produces a clean and bright finish on the surface.

### Advantages:

- Works at room temperature
- Brightens and cleans in one step

### Properties:

- |                        |                               |
|------------------------|-------------------------------|
| • Appearance and odor  | Clear solution with mild odor |
| • Solubility           | Complete                      |
| • PH of -1%-- solution | 1-2                           |

### Application Method:

1. Use **Britener 123** as is for best result, however it can be diluted up to 10 parts with water, depending on the amount of oxidation and soil on the work-piece.
2. Immerse the parts in Britener 123 for 5 to maximum of 15 minutes or brush on the surface and leave it for 5 to maximum of 15 minutes.
3. Rinse thoroughly with water.
4. Neutralize the acid residue with mild alkaline solution if necessary
  - Containers: Polyethylene, polypropylene, PVC.....

### Safety:

This product contains acidic ingredients, use rubber gloves and goggles and protective plastic when using this product.
