Kleen Brite

for

Stainless Steel & Aluminum

Kleen Brite is a concentrated chemical solution that removes oxides, contaminants and brightens all series of stainless steel and aluminum. Special formula of **Kleen-Brite** effectively removes the brown rust spots, grease and oil and produces a clean, uniform and bright finish on the metal surface.

Advantages:

- Works at room temperature.
- Brightens and cleans in one step.
- Removes rust and contaminants.
- Leave no streaks.
- Environmentally safe

Properties:

- | | |
|------------------------|-------------------------------|
| • Appearance and odor | Clear solution with mild odor |
| • Solubility | Complete |
| • PH of -1%-- solution | 2 |
| • Biodegradability | Yes , all surfactants |

Application Method:

1. Use **Kleen Brite** as is for best result, however it can be diluted up to 3 parts with water depending on the amount of oxidation and soil on the work-piece.
2. Immerse, brush or spray the parts with **Kleen Brite** for 5 - 10 minutes. Light scrubbing will help the cleaning process.
3. Rinse thoroughly with water.
