Prepare A-27

(Prep for Aluminum)

Prepare A-27 is a concentrated chemical solution that removes oxide, contaminants and prepares the aluminum for improved paint adhesion and corrosion resistance. Prepare A27 special formula effectively removes the oxides, grease and oil and produces a clean and passivated surface, providing a firm base for paint.

Advantages:

- Works at room temperature
- Preps and cleans in one step
- Deoxidizes and removes corrosion from aluminum
- Provides a light etch for decorative purposes or paint adhesion

Properties:

- | | |
|------------------------|-------------------------------|
| • Appearance and odor | Clear solution with mild odor |
| • Solubility | Complete |
| • pH of -1%-- solution | 1-2 |

Application Method:

1. Prepare A27 is used in concentrations of 1 part Prepare A27 to 3 parts water, depending on the amount of oxidation and soil on the work-piece.
2. Immerse the parts in Prepare A27 for 5-10 minutes or brush on the surface and leave it for 5-10 minutes.
3. Rinse thoroughly with water.

Safety:

This product contains acidic ingredients, use rubber gloves and goggles and protective plastic when using this product.
