

HI-Chlor Sanitizer

DESCRIPTION

This is a multipurpose, heavy-duty industrial bleach concentrate. **It contains 12.5% available Chlorine.** It is safe to use for all your industrial cleaning needs. Bleach has a long and well-established history of efficacy in food processing, food service, general sanitation and laundry use.

INSTRUCTIONS

Food or Dairy Processing Equipment: Clean and rinse equipment in normal manner. Wet all surfaces thoroughly with a Sodium Hypochlorite solution as directed by USDA guidelines. Allow to air dry. Do not rinse surface prior to processing food. Do not soak overnight. **Note:** Test this and all chlorine products with a chlorine test kit for proper strength prior to use as a sanitizing solution, **normal chlorine concentration required is 200 ppm.**

Machine Dishwashing Terminal Rinse Sanitation: Adjust automatic dispensing equipment to provide sanitizing use solution of 100 to 200 ppm available chlorine by weight according to public health Authorities. Use solution should be tested frequently with suitable chlorine test kit to ascertain that the rinsate strength does not fall below 50 ppm.

Use table below for addition of this product to maintain available chlorine residual:

1 ounce Bleach Concentrate per -	40 gallons water =	25 PPM Chlorine
1 ounce Bleach Concentrate per -	20 gallons water =	50 PPM Chlorine
1 ounce Bleach Concentrate per -	10 gallons water =	100 PPM Chlorine
1 ounce Bleach Concentrate per -	5 gallons water =	200 PPM Chlorine
3 ounce Bleach Concentrate per -	5 gallons water =	600 PPM Chlorine

FEATURES

- Concentrated
- Multipurpose
- Low use cost
- Nonflammable
- Free rinsing

SPECIFICATIONS

Appearance:	Pale Yellow	pH:	11.0+
Odor:	Chlorine	Detergency:	Good
Specific gravity:	1.2
