

ACTIVE

DESCRIPTION

This product is a special blend of bacteria and enzymes that, under proper conditions, will eliminate organic matter and the odors caused by decay. Active can be sprayed directly onto surfaces for general odor control. This product's bacterial action will digest materials in which are causing odors such as vomit, spoiled foods, decomposed animals, and animal waste in areas such as garbage cans, waste receptacles, locker rooms, and carpet. Only Active's pleasant scent will be left behind.

In carpet cleaning, Active can be used as a carpet deodorizer and digestant of organic waste such as urine and fecal matter and odors from many sources. This product quickly works to digest all residues attached to carpet fibers relieving the carpet of stains and odors. Active can be used in conjunction with many types of carpet cleaning equipment and methods. The product can be added directly to the solution tank or used in a pump-up sprayer. Active works extremely well with hand, bonnet, and extraction cleaning methods.

This product will promptly digest decayed matter in grease traps, septic tanks, down pipes, porta-toilets, and holding tanks in recreational vehicles and boats. Active can also be used for effective odor control in medical and institutional facilities such as hospitals, nursing homes, schools, prisons, clinics, and industrial plants. This product is completely non-toxic, biodegradable, and salmonella free.

INSTRUCTIONS

For general odor control spray product directly on malodor and allow the bacterial action to digest the material and odor. For carpet deodorizing and digesting organic waste, spot clean and vacuum carpet thoroughly. Mix 1/2 to 1 pint of product per gallon of water. Apply with pump or hand sprayer. Keep moist for at least 30 minutes. If used in carpet cleaning equipment, use 1/2 to 1 pint of product to every gallon of mixed solution.

For grease traps conditioning, less than 20 cubic feet capacity, add 4-5 oz. of product daily by pouring in sink or pipeline. For grease traps larger than 20 cubic feet, add 8-10 oz. daily using same procedure.

For Porta-toilet applications, add 1 gallon directly and cover the solids with water to aid digestion. Each time toilet is pumped, start treatment again with 1 gallon of product. Septic tanks are treated with 1 pint per 25 cubic feet capacity; thereafter, use 8 oz. per week. Pour directly in toilet then flush. If septic tank is clogged and odorous, add 1 gallon of product directly to tank.

For use in recreational vehicles and boats, add 2 oz. per gallon of water in hold tank. Thereafter, use 1 oz. per gallon as needed. For use at a dump station, use 1 gallon per 50 gallons of tank capacity, then use 1 pint per week for maintenance. For drain lines, use a minimum of 2 times weekly at 4 oz. of product for each 2 inches of pipe size.

FEATURES

- Digests organic matter
- Neutralizes malodors
- Totally biodegradable
- Flexible applications
- 5 billion cfu/g minimum
- Certified salmonella free
- Eliminates pet stains and odors
- Keeps pipes running free

SPECIFICATIONS

Appearance:	Milky White	pH:	6.5 - 7.5
Odor:	pleasant	Biodegradable:	Yes
Specific gravity:	1.00	Detergency:	Excellent
