

Foam Brite

RTU Foaming Acid Bathroom Cleaner

EPA Registration # 10324-160-61524

Disinfectants

Description

Foam Brite is a ready to use, acid-based disinfectant cleaner with special FOAMING ACTION for fast and efficient maintenance of all surfaces found in restrooms, shower rooms and locker rooms. This product contains a high level of acid and together with an acid compatible detergent system, facilitates the easy removal of soap scum, rust stains, calcium deposits and hard water stains. It uses a 5th generation quat as its disinfectant base that has been proven highly effective in the presence of organic soils. The cationic detergent system inhibits acid corrosion of metal parts found around tubs and showers.

Directions for Use

Surfaces must remain wet for 10 minutes.
10 Minute Disinfectant activity against bacteria and viruses in the presence of organic soil.

1. Spray directly on soiled surface.
2. Allow foam to wet surface for 10 minutes.
3. Wipe off with damp cloth or sponge.
4. Rinse surfaces thoroughly with water.

Preliminary cleaning is required for heavily soiled areas. Extremely heavy soil may require agitation with a mild scrubbing pad or brush. For detailed directions on other applications please call Harvard Chemical and request the Master Label.

Safety Cautions

- Keep out of reach of children
- Prior to using this or any cleaning product, make sure employees read and understand the hazard information found on the product label and Material Safety Data Sheet (MSDS). The label and MSDS will also provide information on handling precautions, protective equipment and first aid instructions which might be appropriate for this product.

Features & Benefits
