

## **Sparkle**

### **DESCRIPTION**

This product is a non-acidic cleaner that removes stains, soap and lime films, dulling, soap scum, body oil residues, and soil from all surfaces. Use on any type of flooring surface. Especially recommended for terrazzo, ceramic tile, marble, concrete and similar hard porous surfaces. It will not bleach or etch and is safe for the floor. The action of this product is unique in that it actually dissolves scum build-up left behind by improper maintenance methods and the use of improper cleaners.

### **INSTRUCTIONS**

For Floors not containing deposits of wax, oil, grease, or seal: Dilute 3 to 5 1/2 cups (24 to 44 ounces) concentrate per gallon of water, depending on amount of scum to be removed.

For Floors containing deposits of wax, oil, grease: Mix together 4 cups concentrate with 1 1/2 cups liquid detergent cleaner concentrate per gallon of water.

Generously spread either of the above solutions on the floor with a mop. Depending on the scum build-up, allow the solution to sit on the floor 10 to 20 minutes without drying. Agitation using a rotary floor machine with a nylon scrubbing pad or scrub brush will hasten performance and improve cleaning time. Pick up the solution with a mop or wet/dry vacuum. Rinse thoroughly using a clean mop and clear, cool water.

Tile Walls: Apply undiluted concentrate using a suitable applicator. Permit solution to stand 5 minutes or more without drying. After soil has been loosened, wipe or pick up solution and rinse with clear, cool water.

### **FEATURES**

- Removes scum build-up left behind by improper maintenance methods and the use of improper cleaners
- Helps eliminate health hazards originating from scum build-up
- Returns color and luster back to soiled surfaces
- Contains no harmful abrasives, corrosives or other damaging chemicals
- May be used on any surface not harmed by water

### **SPECIFICATIONS**

Appearance:	Clear Pink Liquid	pH:	11.5
Odor:	Pleasant	Biodegradable:	Yes
Specific gravity:	1.02		

### **SAFETY**

Keep this and all chemicals out of the reach of children! This product is non-toxic to users, and non-corrosive to metal, at any dilution. It is non-flammable as well and has no flash point.
