

FLOOR SHOCK

DESCRIPTION

Floor Shock is a highly versatile blend of acidic and chelating agents for efficient and safe dissolving of soap scum and minerals from variety of surfaces such as tile and masonry.

Floor Shock is being used once a week to shock the quarry tiles in order to open the pores. This method will increase the coefficient of friction of floors, therefore making the floors less slippery.

INSTRUCTIONS

1. Dilute with 2 parts of water.
2. Flood the floor using mop.
3. Wait about 5 minute then scrub the floor.
4. Rinse the floor with plenty of water.

FEATURES

- Safe on stainless steel and aluminum
- Concentrated for economy

SPECIFICATIONS

Appearance: Clear Blue liquid
Odor: None
Solubility in water: Soluble

pH of 1% solution: 2-2.5
Detergency: Excellent
