

PRESTIGE

DESCRIPTION

PRESTIGE is a new generation metal cross-linked acrylic copolymers that will resist detergents and the scuffing of floors. It is fast laying, quick drying, and its initial gloss is excellent for use in schools, hospitals, or other high traffic areas where high or low speed buffing without powdering is desired. Synthetic detergents and emulsifiers have little effect on this product's gloss and durability. Surfaces coated with this finish will shine even after repeated abuse.

INSTRUCTIONS

For best results apply full strength over freshly stripped and rinsed floor. Apply first coat lightly, being more concerned with even coverage than quantity of finish applied. Allow approximately 15 to 20 minutes drying time between coats then apply a second coat a little heavier than the first. Please allow 24 hours cure time after last coat before high speed burnishing with a pad any darker than beige although under some conditions burnishing between coats can be performed if proper care is taken to test prior to doing.

FEATURES

- Outstanding Gloss
- Ultra High Speed Buff Response
- Fast Dry

SPECIFICATIONS

Appearance: Opaque Liquid
Odor: Bland
Specific gravity: 1.03

pH: 8.5
Biodegradable: Yes

SAFETY

Keep out of the reach of children! Read material safety data sheet for further safety precautions.
