

UPHOLSTERY PRESPRAY

DESCRIPTION

Upholstery Prespray is designed to be used in conjunction with extraction cleaning systems in problem areas that resist cleaning. This product acts quickly to emulsify areas of heavy grime, dirt, grease, and oil that may be ground into upholstery. When used prior to extraction it will improve your cleaning power.

INSTRUCTIONS

Use as is. Apply in a mister employing a trigger sprayer. Lightly mist problem areas and then extract as normal. If any stains persist, spray stained area, brush with a hand brush and then blot with a clean towel.

FEATURES

- May be used alone as a spotter
- When used with extraction cleaning systems, it increases performance
- May be used on fabric or upholstery
- Concentrated
- Biodegradable

SPECIFICATIONS
